

CITY OF SAN JOSE

Building Inspector/Combination Certified (3915 FT) (3916 PT)

CLASS CODE: 3915		
DEPARTMENT: Planning, Building, & Code Enforcement	ACCOUNTABLE TO: Building Inspector, Supervisor	FLSA STATUS: Non-Exempt

CLASS SUMMARY:

Incumbents are responsible for performing a wide variety of inspection related duties with minimal supervision. Duties may include: conducting inspections of industrial, commercial, manufacturing, and residential facilities to ensure compliance with codes, regulations, ordinances, and standards; investigating zoning, code, building, construction and land use changes in the field; gathering factual data to ascertain present use of land and location of structures; inputting data into system for general public access; assisting in the review of projects; setting up inspection schedules; generating written reports and enforcement orders; checking plans for compliance with codes; providing technical assistance for the development of new codes; and, coordinating smaller projects.

DISTINGUISHING CHARACTERISTICS:

The Building Inspector is the first level in a three-level series. The Building Inspector is distinguished from the Permit Technician class which is responsible for providing technical support and over the counter assistance. The Building Inspector is distinguished from the Building Inspector, Supervisor which is required to manage projects and has supervisory authority.

The Building Inspector/Combination classification is inclusive of three specialty groups: Building, Electrical, and Plumbing/Mechanical. Incumbents in the classification will be identified as holding one of the three specialties upon hire into the classification, and this designation will be used in the event of position reductions. Displacement would occur by seniority order within the specific specialty group.

Training and Experience (positions in this class typically require):

High School Diploma or General Equivalency Diploma (G.E.D.); or any equivalent combination of education and experience sufficient to successfully perform the essential duties of the job such as those listed above.

Building Specialty Inspector positions require four years of varied construction experience equivalent to either a journey level carpenter, or related contractor, including one year in a supervisory capacity; or two years of combination inspection experience for a public agency and two years of journey level carpentry experience.

Electrical Specialty Inspector positions require four years of varied construction experience equivalent to either a journey level electrician, or related contractor including one year in a supervisory capacity; or two years of combination inspection experience for a public agency and two years of journey level electrical experience.

Plumbing/Mechanical Specialty Inspector positions require four years of varied construction experience equivalent to either a journey level plumber or air conditioning mechanic, or related contractor, including one year in a supervisory capacity; or two years of combination inspection experience for a public agency and two years of journey level plumbing/mechanical experience.

CITY OF SAN JOSE

Building Inspector/Combination Certified (3915 FT) (3916 PT)

Licensing Requirements (positions in this class typically require):

- Valid California Driver's License.
- Certification - As a condition of continued employment, employees must obtain and maintain valid certifications issued by an agency acceptable to the City as a Certified Inspector in the categories of Building, Plumbing, Mechanical, and Electrical according to the following timetable: one certificate by the end of the first year of employment, the second certificate by the end of the second year, the third certificate by the end of the third year, and the fourth certificate by the end of the fourth year of employment. For employees who have certification(s) at time of hire, the employee is required to obtain one certification per year until all four certifications have been obtained.
 - Commercial certification is required in the employee's specialty area. Residential 1-2 family dwelling certification is required for non-specialty areas.
